IP24

ENERGY SAVING, RELIABLE, LONG LIFE

- **ENERGY SAVING** – with minimal heat losses, thanks to the perfect heat insulation of thick ECO penopolyurethan;
- **LONG LIFE** - innovative formula of wear-proof zirconium enamel and anti-corrosion cathode protection;
- **RELIABLE** – with a reliable "6-level protection"
- Suitable for installation in premises without plumbing system for hot water
- Easy and quick installation – the device is fully equipped and no additional accessories or installation elements are needed;
- The sets are included into the unit price;
- Combined safety valve – acting as a balance, return and differential valve;
- External thermoregulator - for setting the water heating temperature
- Illuminated switch;
- With an option for building-in an anode tester that checks the status of the magnesium anode;
- Modern elegant design.

Installation:	Above the sink
Capacity range:	7
Nominal power (kW):	1.5
Energy efficiency class:	B
Voltage [V]:	230 V~
Work principle:	Under pressure
Nominal pressure [MPa]:	0.7
IP protection:	IP24
Annual electricity consumption [kWh/annum]:	89
Nominal volume [l]:	
Load profile:	3XS
