

### Technologies:

- A unique heat energy accumulator in drinking water systems. Provides for hot water needs for a long period of time, with no serpentines inside. The buffer vessel allows for convenient ways

to connect and control through the number of technological holes /sockets/ and could be installed anywhere. This special purpose tank is non-enameled which particularly makes it unsuitable for hot water sanitary needs.

- ENERGY SAVING – insulation from 100 mm thick CFC-free polyurethane foam to guarantee minimum heat losses;
- Sensor socket – with a thermal sensor fitted inside to send data to the heating system control;
- Temperature indicator – to report boiler water heating temperature.

Capacity range:	<b>2000</b>
Dimensions ØxH [mm]:	<b>1400 x 2255</b>
Water tank:	<b>Non-enameled</b>
Nominal pressure [MPa]:	<b>0.3</b>
Number of heat exchangers:	<b>-</b>
Standing loss [W]:	<b>178</b>
