

Series:

## Green Line

Technologies:

- A unique heat energy accumulator in drinking water systems. Provides for hot water needs for a long period of time, with no serpentines inside. The buffer vessel allows for convenient ways to connect and control through the number of technological holes /sockets/ and could be installed anywhere.
- ENERGY SAVING - CFC free insulation of environmentally friendly formula of polyurethane foam of high density and thickness of 80 mm to ensure minimum heat losses;

- Sensor socket – with a thermal sensor fitted inside to send data to the heating system control;
- Temperature indicator – to report boiler water heating temperature;
- Casing made of a synthetic INOX-coloured wear-proof material.
- This special purpose tank is non-enamelled which particularly makes it unsuitable for hot water sanitary needs.

Capacity range:	<b>500</b>
Energy efficiency class:	<b>B</b>
Dimensions ØxH [mm]:	<b>800 x 1765</b>
Water tank:	<b>Non-enameled</b>
Nominal pressure [MPa]:	<b>0.3</b>
Number of heat exchangers:	<b>-</b>
Standing loss [W]:	<b>73</b>
