

Technologies:

This is a buffer tank with an enamelled water tank designed for cooling and heating systems. It

ensures hot water supply for a long period. The design of this model provides convenient connection and control options through multiple technological openings (fittings) and can be installed anywhere.

- Minimal heat loss and no condensation: The thick 80 mm insulation made of CFC-free polyurethane foam ensures minimal heat loss when used in heating systems and prevents condensation when used in cooling systems.
- SHIELD technology for long operational life: We use a unique wear-resistant enamel coating with increased zirconium content for the water tank.
- Thermosensor fitting.
- No coils.

Capacity range:	500
Energy efficiency class:	B
Weight [kg]:	124
Dimensions ØxH [mm]:	800 x 1765
Water tank:	Enameled
Nominal pressure [MPa]:	0.6
Number of heat exchangers:	-
