

## Technologies:

ELDOMINVEST, as a leading Bulgarian manufacturer of energy-efficient appliances, follows market trends to ensure comfort in homes, offices, and hotels. Wall-mounted buffer tanks with a capacity of 50 liters are a compact addition to the portfolio of alternative energy appliances:

- Easy installation and maintenance - 1/2 inch nipples for air release and drainage of the appliance, located at the bottom of the buffer;
- 6 G1 1/4 F size outlets;
- 2 openings for sensors - flange with a thermal sensor tube and a socket for a thermostat;
- Minimum heat loss - thick CFC free insulation;

- SHIELD technology - a unique formula for wear-resistant enamel coating for durability and long life of the water tank;
- Effective operation in two modes - Heating and Cooling;
- Perfect addition and for other systems (heating, cooling systems);
- Two sockets for thermo sensors;
- Domestic hot water.

Capacity range:	<b>50</b>
Energy efficiency class:	<b>C</b>
Dimensions ØxH [mm]:	<b>387 x 735</b>
Water tank:	<b>Enameled</b>
Nominal pressure [MPa]:	<b>0.6</b>
Number of heat exchangers:	<b>-</b>
Standing loss [W]:	<b>53</b>
