

### Technologies:

This buffer tank model is designed for simultaneous heating of water both for heating and for

hygienic household needs. The flow-through heating principle and the large capacity provide a significant quantity of household hot water. The corrugated heat exchanger disposes with a large contact area and is made of so-called medical chrome-nickel steel brand AISI316L. This guarantees the preservation of the potable qualities of the hot water throughout the whole exploitation of the device.

- ENERGY SAVING - CFC free insulation of environmentally friendly formula of polyurethane foam of high density and thickness of 85 mm to ensure minimum heat losses;
- Terminals, convenient for installation and service;
- Circulation socket;
- Thermostat sockets;
- Venting plug.

Capacity range:	<b>500</b>
Energy efficiency class:	<b>B</b>
Dimensions ØxH [mm]:	<b>800 x 1765</b>
Water tank:	<b>Non-enameled</b>
Nominal pressure [MPa]:	<b>0.3</b>
Number of heat exchangers:	<b>1</b>
Standing loss [W]:	<b>74</b>
