Introducing the **ELDOM EP61 instantaneous electric water heater** – a compact and practical solution for quick and easy access to hot water, with no waiting time and no need for preheating.

- **Unlimited hot water** – Instantaneous heating technology heats water in real time, without the need for storage or preheating, providing hot water whenever you need it.
- **Three power levels** – The EP61 offers a choice of **3.5 kW, 4.5 kW and 5.5 kW**, allowing you to adjust the appliance's operation to your specific needs and achieve an optimal balance between comfort and energy consumption.

- **Dynamic power control** – Intelligent control automatically adjusts the power according to current water consumption, ensuring more efficient use of electricity.
- **LED display with temperature indication** – The intuitive LED display shows the water temperature in real time, providing easy control and convenient temperature adjustment.
- **Display adaptable to the installation position** – The LED display can be rotated **180°**, ensuring that the information is clearly visible regardless of whether the appliance is installed above or below the sink.
- **Maximum installation flexibility** – The EP61 can be installed both **above and below the sink**, with the connections positioned either upwards or downwards. The appliance comes with the necessary installation accessories for quick and convenient installation.
- **Reliable and safe heating element** – The encapsulated aluminium heating element does not come into direct contact with the water, reducing limescale build-up and contributing to a longer service life.
- **Compact size** – The EP61 is designed to occupy minimal space, making it an excellent choice for small kitchens, bathrooms, utility rooms and other areas with limited installation space.
- **Easy installation** – The package includes installation and service components, a flexible connection hose, seal, mounting kit, wall plugs and screws, adapter, aerator and power cord, making installation quick and convenient.

ELDOM EP61 – more comfort, more control and hot water exactly when you need it.

Installation:	Above the sink, Under the sink
Nominal power (kW):	
Energy efficiency class:	A
Weight [kg]:	
Voltage [V]:	230 V~
Nominal pressure [MPa]:	0.6
Height x Width x Depth [mm]:
