Solar flat collector ClassicR 1.5 m2

Technologies:

- highly absorbing;
- ribbed aluminum absorber of a multilayer selective coating from a leading German supplier;
- selective coating laser welded to absorber;
- collecting and absorbing pipes made from copper;
- insulation made of stone mineral wool – 40 mm, to guarantee minimum heat losses, even in extreme conditions;
- hardened heat resistant prismatic glass of low iron content;
- unique steady construction – a frame from a single-component aluminum profile, anodized

coated;
- gaskets from UV-protected and heat-resistant silicone;
- long period of operation.

Weight [kg]:	**27**
Gross surface area [m2]:	**1.5**
Dimensions:	**1000x1500x85**
