Water heater 80 L, 2.0 kW, enameled, slim design

ErP READY

A C G

Technologies:

When developing the ELDOM Style water heaters we have concentrated our efforts on the balancing of the competitive low price with all of the features and functions, expected from a standard electric household water heater. All of that – without making any compromises with the quality and the reliability of the appliance. The appliance is without a switch

- Stylish design in white matte finish;
- Safe – with unique six-level protection;
- Long life – high temperatures resistant water tank coating, due to the innovative enamel formula with increased content of zirconium (Zr);
- Dense HFO insulation;
- Anti-corrosion protection – a magnesium anode protecs the entire water tank volume from the corrosive processes;
- Special round flange, know-how of ELDOMINVEST;
- External capillary thermostat;
- Capillary thermal cut out;
- Combined PBT safety valve “3 in 1” – performing the actions of a balancing, check and differential valve;
- Elegant temperature indicator;
- White matte body;
- On / off light indication;

Installation:	**Vertical**
Capacity range:	**80**
Water tank:	**Enameled**
Nominal power (kW):	**2**
Energy efficiency class:	**C**
Control:	**mechanical control**
Dimensions ØxH [mm]:	**387 x 1133**
IP protection:	**IP24**
Annual electricity consumption [kWh/annum]:	**1337**
