

Tehnologii:

IP24

When developing the ELDOM Style water heaters we have concentrated our efforts on the balancing of the competitive low price with all of the features and functions, expected from a standard electric household water heater. All of that – without making any compromises with

the quality and the reliability of the appliance.

- Stylish design;
- Safe – with unique six-level protection;
- Long life – high temperatures resistant water tank coating, due to the innovative enamel formula with increased content of zirconium (Zr);
- Dense Closed-Cells HFO insulation;
- Anti-corrosion protection – a magnesium anode protects the entire water tank volume from the corrosive processes;
- Special elliptic flange, know-how of ELDOMINVEST;
- External capillary thermostat;
- Capillary thermal cut out;
- Combined PBT safety valve “3 in 1” – performing the actions of a balancing, check and differential valve;
- Temperature indicator;
- On / off light indication.

Montare:	Vertical
Grup de capacitate:	80
Rezervor:	Emailat
Puterea nominală (kW):	2
Clasa de randament energetic:	C
Gestionarea:	cu gestionarea mecanică
Dimensiunile de gabaritØxH [mm]:	387 x 1133
Tensiunea nominală (V):	230 V~
Presiunea nominală [MPa]:	0.8
Protecție IP:	IP24
Consumul anual de energie electrică [kWh]:	1337
Volumul nominal [l]:	
Profilul de sarcină:	M
Culoare:	Alb
